

LEILANI BENNETT

Project Management Intern (R107659)

07511574843 | rosezelda51@gmail.com

PROFILE

First Class Honours Computer Games Development graduate (BSc Hons, University of Westminster) with direct experience managing full-cycle game development, feature roadmaps, and cross-functional production pipelines. Proven track record in structuring 7-phase project lifecycles, managing milestone schedules using Gantt charts and Trello, conducting formal risk assessments, and executing strategic scope reductions to protect build quality and delivery deadlines. Combines technical literacy in Unreal Engine 5, C++, and backend services with strong data-driven analytical skills developed through coordinating 52-participant playtests, 60-point QA matrices, and fast-paced retail operations. Eager to support Level Infinite's production and project management teams in delivering world-class publishing operations and game releases.

TECHNICAL SKILLS

- **Production & Project Management:** Agile & Waterfall Lifecycles, Scope Management, Milestone & Schedule Planning (Gantt Charts), Risk Assessment & Mitigation, Stakeholder Management, Task Prioritization, Throwaway Prototyping.
- **Management & Collaboration Tools:** Trello, Git & GitHub (Branching & Version Control), Google Workspace, Microsoft Excel (Data Analytics & Charting), Visual Studio, JetBrains Rider.
- **Technical Literacy & Pipelines:** Unreal Engine 5 (Lumen, Sequencer, UMG), C++, C#, Data Tables, Microsoft PlayFab SDK, Asset Import & Optimization Pipelines.
- **QA & User Research:** Test Suite Design, White-Box & Black-Box Test Tracking, Defect Prioritization, Quantitative & Qualitative User Survey Analysis, KPI Monitoring.

FEATURED GAME PRODUCTION & MANAGEMENT PROJECTS

Sole Developer | Fictitious Choices (UE5 Narrative Prototype)

Final Year Engineering Project (BSc Hons) | Awarded First Class

- **Lifecycle & Milestone Planning:** Managed end-to-end delivery across 7 structured development phases (Research, Design, Prototype, Implementation, Optimisation, Testing, Reflection) utilizing Gantt charts and Trello for milestone tracking and task allocation.
- **Risk Mitigation & Scope Control:** Executed throwaway prototyping to evaluate high-risk features early; conducted formal risk assessments and implemented strategic scope reductions (decoupling unstable cloth physics and reducing map count) to stabilize framerates from 18 FPS to a stable 40–50 FPS baseline.
- **Stakeholder & Architecture Coordination:** Authored stakeholder analyses aligning primary user requirements, tertiary backend requirements (Microsoft PlayFab integration), and modular C++ event subsystems for extensible team handoff.
- **Quality Assurance Management:** Designed and tracked a comprehensive 60-point verification framework (30 white-box logic tests, 30 black-box user flow tests), achieving an overall 88% pass rate across critical release systems.
- **User Research & Data Synthesis:** Coordinated remote playtesting across 52 external participants, collecting, analyzing, and visualizing qualitative and quantitative survey data to validate player engagement metrics and design effectiveness.

Collaborative Game Development Projects | University of Westminster

Games Development Group Delivery

- Coordinated multi-contributor project repositories on GitHub, managing branch merging, conflict resolution, and documentation standards to ensure smooth integration, Maintained sprint delivery schedules

EDUCATION

University of Westminster, London, ENG

2021 - 2026

Bachelor of Science (BSc) Honours in Computer Games Development

University of Westminster, London | Class of Award: First Class Honours (Graduated August 2026)

Developing strong foundations in programming, mathematics, and problem-solving through individual and group projects. Gained experience in C++, C#, Python, Games development, version control (GitHub), and structured project delivery within deadline-driven environments

- Key Focus: Software lifecycle methodologies, technical documentation, object-oriented design, network security, and project risk management.

AIM Level 3 Extended Diploma in Games, Animation, and VFX Skills

Uxbridge College, London | 2019 – 2021 | Grade: Distinction

- Developed foundational skills in game production pipelines, C++/C# programming, and agile collaborative project tracking using GitHub and Rider.

WORK EXPERIENCE

STORE COLLEAGUE

Next - Harrow

10/2024 - Current

- Utilize internal enterprise inventory systems to process stock tracking, data audits, and high-volume e-commerce orders.
- Collaborate within a multidisciplinary team, consistently meeting and exceeding weekly KPI performance benchmarks.

STORE ASSISTANT

CEX - Ruislip

01/2024 - 07/2024

- Diagnosed and tested consumer electronics hardware, auditing device performance and operating software.
- Maintained accurate database records for real-time stock transfers and digital cataloging.

CUSTOMER SERVICE ADVISOR

Arvato CRM Solutions - BMW, Berkshire, Slough

06/2022 - 12/2022

- Handled inbound technical and service queries via CRM systems, routing high-priority cases across branch networks.
- Documented support cases systematically while achieving upper-quartile resolution times and customer satisfaction metrics.
