

LEILANI BENNETT

Software Engineering Intern (R107162)

07511574843 | rosezelda51@gmail.com

PROFILE

First Class Honours Computer Games Development graduate (BSc Hons, University of Westminster) specializing in C++, Unreal Engine 5 client architecture, and backend service integration. Experienced in building modular C++ event subsystems, integrating Microsoft PlayFab SDK for client authentication and player statistics upload, and implementing data-driven game frameworks. Proven track record in profiling and resolving client performance bottlenecks, client debugging, and maintaining rigorous test coverage (88% pass rate across 60 test suites). Eager to contribute to Level Infinite's PASS unified account architecture and internal developer toolchains.

TECHNICAL SKILLS

- **Programming Languages:** C++, C#, Python
 - **Game Engines & Tools:** Unreal Engine 5 (UE 5.7)/UE4, Unity, JetBrains Rider, Visual Studio, Git/GitHub,
 - **Client Architecture & Tooling:** C++ UI Event Subsystems, Dynamic Multicast Delegates, Component-Based Design, Data Tables & Data Assets, GameInstance State Management
 - **Backend & Cloud Integration:** Microsoft PlayFab SDK (Blueprint/C++ interfaces), User Authentication, Cloud Data Persistence, JSON Serialization, Local Save Fallbacks
 - **Profiling & Optimization:** Memory Profiling, CPU/GPU Draw Call Optimization, Frame-Pacing Analysis, Soft Reference Loading
 - **Testing & Methodologies:** White-Box & Black-Box Testing, Agile/Waterfall Lifecycle, Technical Documentation
-

EDUCATION

University of Westminster, London, ENG

2021 - 2026

Bachelor of Science (BSc) Honours in Computer Games Development

University of Westminster, London | Class of Award: First Class Honours (Graduated August 2026)

Developing strong foundations in programming, mathematics, and problem-solving through individual and group projects. Gained experience in C++, C#, Python, Games development, version control (GitHub), and structured project delivery within deadline-driven environments

- **Client Architecture & Tooling Focus:** Designed modular engine components, implemented object-oriented design patterns, and built client-side tools using C++ and C#.
- **Optimization & Debugging:** Practiced profiling and debugging memory leaks, draw calls, and threading bottlenecks within standalone applications and engine environments.

- Modular Data-Driven Gameplay Systems: Built scalable dialogue and quest log components driven by structured Data Tables (DT_) and Data Assets (DA_), decoupling narrative content and inventory state logic from core gameplay actors.
 - Client UI Event Subsystem (C++): Architected a decoupled C++ UI Event Subsystem utilizing dynamic multicast delegates (FOnUIStateRequested, FOnUIGoBackRequested) and an EUIState enumeration, eliminating hard-coded dependencies across HUD and menu widgets.
 - Core Competencies: Object-Oriented Architecture, Data Structures & Algorithms, Network Protocols, Engine Memory Management, Shader Programming.
-

Uxbridge College, London, ENG

2019-2021

A-Levels, AIM Qualification Level 3 Diploma/Extended Diploma in Games, Animation and VFX Skills, Award: Distinction

Developed fundamental skills in programming, mathematics, and software development through the creation of games, animations, and VFX projects. Gained hands-on experience using C++ and C# to design and create games using Unity and Unreal Engine while managing projects with GitHub, Visual Studio, and Rider in both individual and team-based environments.

WORK EXPERIENCE

STORE COLLEAGUE

Next - Harrow

10/2024 - Current

- Utilize internal enterprise inventory systems to process stock tracking, data audits, and high-volume e-commerce orders.
- Collaborate within a multidisciplinary team, consistently meeting and exceeding weekly KPI performance benchmarks.

STORE ASSISTANT

CEX - Ruislip

01/2024 - 07/2024

- Diagnosed and tested consumer electronics hardware, auditing device performance and operating software.
- Maintained accurate database records for real-time stock transfers and digital cataloging.

CUSTOMER SERVICE ADVISOR

Arvato CRM Solutions - BMW, Berkshire, Slough

06/2022 - 12/2022

- Handled inbound technical and service queries via CRM systems, routing high-priority cases across branch networks.
 - Documented support cases systematically while achieving upper-quartile resolution times and customer satisfaction metrics.
-
